17. Payson Roundup pull-in story: the Roundup's own site could not be opened in this run's browser tool and its Instagram was not reachable, so no visit is claimed. From search-indexed listings of Roundup articles: the first North Inch Renaissance Faire at the Payson Golf Course was a success and its organizers are already planning next year (checked against the organizer's own site, northinchrf.com); that good-news item stands in the paper's lead. No brand-new local business opening was confirmed today.

5. The Morning Record

1. The Payson Morning Scroll for Friday, Nov. 6, 2026 stands published (Merchant of the Hold: Ruby Road Vintage Mall, Camp Verde; tale: Mittens for the Antlers; Stories Around the Rim episode 7: Ten Minutes Late at the Seven Thousand Steps; 5 pages).

1a. Scroll publish quotes, from the chain verify log ~/workspace/morning-post/batch/logs/verify-2026-11-06-20261106-120547.log: --finish verdict — "VERDICT: PASS" (attempt 2, after the first attempt hit GitHub Pages lag with 404s). PDF checksum pair, copied from that log's PASS line for the PDF: manifest md5 091e91d8492264d28b0037804afb197c / live md5 091e91d8492264d28b0037804afb197c — the pair matches.

1b. Clock re-check: the 06:10 re-check for today had not reported yet when this record was written — no clock-verify file for 2026-11-06 stands in the batch logs. Yesterday's clock file was checked as well: no clock-verify file for 2026-11-05 stands there either (the newest clock file there is dated 2026-10-17), and no FAIL stands in any clock file found.

1c. Listen lines: every part of the paper recorded clean — the lead story, Happening in the Holds Today, The Days Ahead, Merchant of the Hold, Stories Around the Rim, and Tales from the Treeline — each part's record file stands with its recording at the recorded size, the paper carries all six listen lines, and each recording was published with the edition (every send ended VERDICT: PASS). No part's listen line is missing. The whole-edition recording stands on the manifest at audio/morning-scroll-2026-11-06.mp3 (8,103,437 bytes) and verified live in the --finish PASS run; the voice queue stands empty. One note from the chain itself: the first chain run stopped because the edition JSON was not yet in the edition folder; the file was put in place, the chain re-ran clean, and that first stop is carried in the batch list below.

1d. Hearth prop inventory: step 9's check read VERDICT: MATCH — the state SHA matches the GitHub SHA — so no publish was needed and no inventory line is owed.

1e. Note on this morning's first try: an earlier run of this briefing stopped at the weather pull (the weather service answered 429 on all tries) and wrote an error line in the pile. This run is the retry: the pull succeeded, and the edition stands published as above. That error line is carried in the pile list below, in its own words.

2. Batch processing last night — numbered list, each line read from that job's own dated verify log for 2026-11-06:

1. Morning Scroll chain — completed. Its named verify log (above) ends VERDICT: PASS, and no clock FAIL stands against it. Its pile finish line reads: "edition published, chain VERDICT: PASS, checksum pair matched" — it agrees with the verify log. Carried with it: a pile ERROR line from build_and_manifest.py naming the first chain run's stop (the edition JSON was not yet in the edition folder); the input was fixed, the chain re-ran, and the --finish verify passed — the error line and the log are both told here, and the chain's own finish state is the PASS above.

2. Gilded Pages verify — had an error — needs your attention. Its log (~/workspace/batch-logs/gilded-pages-healthcare-rollout/2026-11-06.log) ends VERDICT: FAIL — no slugs in slugs file. Its pile lines agree: "ERROR — 0 entries published, Prescott/Prescott Valley, batch verify VERDICT: FAIL - no slugs, all 7 holds still held".

3. yard sales verify — completed. Its log (~/workspace/batch-logs/yard-estate-sales-refresh/2026-11-06.log) holds two runs; the last VERDICT line in the file says PASS (the first run's live mismatch cleared on the re-run). Its pile line agrees: "VERDICT: PASS".

4. Steward's Ledger verify — completed. Its log (~/workspace/batch-logs/stewards-ledger-daily/2026-11-06.log) ends VERDICT: PASS. Its pile line agrees: "Edition 26 published, verify VERDICT: PASS".

5. GitHub billing report — completed. Its log (~/workspace/batch-logs/github-billing-watch/2026-11-06.log) ends VERDICT: PASS — total used 16.70% of the 3,000 included minutes (501 minutes). Its pile line agrees: "plan Pro in place, cycle at 501 minutes, 16.70% of the included 3,000".

6. health pull — had an error — needs your attention (no report found). No log for 2026-11-06 stands in ~/workspace/batch-logs/health-pull/ — that folder's newest log is dated 2026-10-18.

7. Hearth publish check — completed. Its dated log (~/workspace/batch-logs/hearth-publish-check/2026-11-06.log) ends VERDICT: MATCH, so no inventory publish was owed.

Mismatch count today: 0 (target 0). Counted across the seven lines above: each job's recorded words dated today were compared with the state its named dated log gives. The Scroll chain's recorded clean finish matches its PASS log (the build_and_manifest ERROR line names a chain part, not one of the seven jobs, and its failure is told in line 1 above); the Gilded Pages recorded ERROR matches its FAIL log; yard sales, the Ledger, and billing recorded finishes match their PASS logs; the Hearth check's log says MATCH and no recorded

words disagree; the health pull has no log for today and no recorded clean finish dated today standing against that.
