80 connectors on hand — 10 of them connected

Connectors report

Friday, November 6, 2026 — every connector Muse can use, grouped by kind, with what is new and what fits you.

Connected now: Facebook, GitHub — your key road (custom), Gmail, Google Calendar, Google Contacts, Google Docs, Google Drive, Google Sheets, Google Tasks, vidIQ.

How this report is ranked: by your own use first — the ones you use every day stand at the top of each group — and then by how well each one fits your life. There is no checked review score for connectors, so this report prints none; any ranking word here rests on use and fit, nothing else.

New today

This is the first edition — the first snapshot of the catalog. Nothing counts as new yet; from tomorrow on, this section names any connector that appears in the catalog for the first time.

Fits you

Not connected yet, and their use plainly fits your life:

HealthEx — Gathers your records from your own healthcare providers — conditions, medicines, allergies, lab results and visit notes — into one place you can read before a visit.

Function Health — If your blood work runs through Function Health, this reads the lab results and the doctor's notes on them, with the normal ranges beside each number.

Zoom — Reads Zoom meetings, recordings and written summaries — your family's monthly Montano call runs on Zoom.

Ticketmaster — Finds events and shows which seats are open and what they cost — the kind of looking you do for shows around the Holds. Searching needs no sign-in.

OpenTable — Books a table at restaurants that take OpenTable reservations, with the open times shown first. (a guess)

Canva — Lays out signs, posters and pages from ready-made designs — it could serve the signs and menus you make for Mogollon's Hearth. (a guess)

The full list, by kind

Mail, calendar, contacts and tasks — 11

- **Gmail** — Your own Google mailbox — search, read, draft and send mail. (Connected; used daily.)

- **Google Calendar** — Your Google calendars — read the agenda and add, change or cancel events. (Connected; used daily.)
- **Google Tasks** — Your Google to-do lists — read and manage tasks and due dates. (Connected; used daily.)
- **Google Contacts** — Your Google address book — names, email addresses and phone numbers. (Connected; used sometimes.)
- **Calendly** — Your Calendly booking links and the meetings people book on them. (Available — not connected; not used yet.)
- **IMAP Email** — Reads mail from other providers that offer IMAP, such as iCloud Mail. Read-only for now. (Available — not connected; not used yet.)
- **Muse Mail** — Muse's own mailbox, separate from yours — mail Muse itself sends and receives. (Available — not connected; not used yet.)
- **Outlook Calendar** — Microsoft calendars, personal or work — read and manage events. (Available — not connected; not used yet.)
- **Outlook Contacts** — Address books of your Microsoft accounts. (Available — not connected; not used yet.)
- **Outlook Mail** — Microsoft mailboxes, personal or work — read and send Outlook mail. (Available — not connected; not used yet.)
- **Todoist** — Todoist to-do lists, projects, labels and reminders. (Available — not connected; not used yet.)

Files, documents and notes — 11

- **Google Drive** — Your files in Google Drive — find, upload, download, organize and share. (Connected; used daily.)
- **Google Docs** — Your Google documents, including the notes and notebooks you keep as Docs. (Connected; used sometimes.)
- **Google Sheets** — Your Google spreadsheets — read and edit cells, tabs and formulas. (Connected; used sometimes.)
- **Box** — Your Box files and folders, with comments and sharing. (Available — not connected; not used yet.)
- **Dropbox** — Your Dropbox files and folders, and file requests from other people. (Available — not connected; not used yet.)
- **Evernote** — Your Evernote notes, notebooks, tags and attachments. (Available — not connected; not used yet.)
- **Google Forms** — Build Google Forms surveys and read the answers that come back. (Available — not connected; not used yet.)
- **Google Slides** — Your Google Slides presentations — read and edit them. (Available — not connected; not used yet.)
- **Granola** — Notes, summaries and transcripts of your past meetings, kept by Granola. Read-only. (Available — not connected; not used yet.)

- **Notion** — Your Notion workspace — pages, notes and databases. (Available — not connected; not used yet.)
- **Readwise** — Your reading highlights and the articles saved in Readwise Reader. (Available — not connected; not used yet.)

Money, shopping and stores — 16

- **Shopping search (Meta Catalog)** — Searches products across many merchants, with prices, pictures and checkout options. (Ready to use — no sign-in needed; used daily.)
- **Link by Stripe** — Pays with a card saved in Stripe's Link wallet, after you approve the purchase. (Available — not connected; used sometimes.)
- **Shop Pay** — Pays with a card saved in your Shop Pay wallet, after you approve the purchase. (Available — not connected; used sometimes.)
- **Finances (Plaid)** — Reads your linked bank, card, loan and investment accounts — balances, spending and bills. Read-only. (Available — not connected; not used yet.)
- **Grab** — Grocery delivery through GrabMart and restaurant booking through Grab Dine-out, where Grab serves. (Available — not connected; not used yet.)
- **Gumroad** — Sells digital products and memberships for creators on Gumroad. (Available — not connected; not used yet.)
- **Instacart** — Searches groceries and builds a cart at a store you pick; checkout finishes on Instacart. (Available — not connected; not used yet.)
- **Kavak** — A used-car marketplace — search cars, compare prices, find showrooms. Information only. (Available — not connected; not used yet.)
- **Money Forward ME** — Reads bank, card and securities accounts linked in the Money Forward ME app. Read-only. (Available — not connected; not used yet.)
- **Printify** — Print-on-demand products made and shipped for your shops. (Available — not connected; not used yet.)
- **QuickBooks** — A company's QuickBooks books — reports, customers, invoices and payroll. (Available — not connected; not used yet.)
- **Rappi** — Restaurant finding and cart building on Rappi, first rolled out in Mexico. (Available — not connected; not used yet.)
- **ShopBack** — Cashback offers and cashback-tracked shopping links, plus hotel and flight prices. (Available — not connected; not used yet.)
- **Shopify** — Runs a Shopify store of your own — products, inventory, orders and customers. (Available — not connected; not used yet.)
- **Shopify checkout (UCP)** — Buys eligible Shopify-store products found in shopping search, paid with a wallet. (Available — not connected; not used yet.)
- **Stripe** — Runs payments for your own business — customers, invoices, subscriptions and refunds. (Available — not connected; not used yet.)

Travel, tickets and going out — 8

- **Places Search** — Finds places and businesses, with addresses, hours, ratings, reviews and photos. (Ready to use — no sign-in needed; used daily.)
- **Agoda** — Searches places to stay, flights, tours and attraction tickets on Agoda. (Available — not connected; not used yet.)
- **Despegar** — Flight search with flexible dates, monthly price trends and destination deals. (Available — not connected; not used yet.)
- **Duffel** — Searches, books and cancels whole flight trips across many airlines. (Available — not connected; not used yet.)
- **Expedia** — Searches and prices hotels and lodging on Expedia, and books some rates directly. (Available — not connected; not used yet.)
- **FlightAware** — Flight schedules, live status, positions and airport activity. (Ready to use — no account to connect; not used yet.)
- **OpenTable** — Reads live restaurant availability and makes, changes or cancels reservations. (Available — not connected; not used yet.)
- **Ticketmaster** — Finds events and shows the seats still open, with prices. Buying finishes in the browser. (Ready to use — no setup needed to search; not used yet.)

Social, music, video and design — 12

- **Facebook** — Your Facebook — friends, posts, groups, events, saved items and Marketplace. (Connected; used daily.)
- **vidIQ** — YouTube research — channels, videos, keywords and trends, plus titles, thumbnails and scripts. (Connected; used sometimes.)
- **Canva** — Makes and edits Canva designs — posters, pages, presentations — and exports them. (Available — not connected; not used yet.)
- **Figma** — Reads Figma designs and design systems, downloads assets, makes reviewed changes. (Available — not connected; not used yet.)
- **Instagram** — Your Instagram — profiles, posts, stories, saved items, and publishing. (Available — not connected; not used yet.)
- **Instagram Messages** — Reads and sends your Instagram direct messages. (Available — not connected; not used yet.)
- **Messenger** — Your personal Facebook Messenger — read, search and send messages. (Available — not connected; not used yet.)
- **Meta Business Manager (ads)** — Facebook and Instagram advertising — campaigns, spend, audiences and ad policy answers. (Available — not connected; not used yet.)
- **Runway** — Generates and edits video, images and audio with Runway, and runs saved workflows. (Available — not connected; not used yet.)
- **Spotify** — Search and play Spotify music, audiobooks and podcasts; manage playlists and playback. (Available — not connected; not used yet.)
- **Threads** — Your Threads — profiles, posts, replies, feeds and publishing. (Available — not connected; not used yet.)

- **Threads Messages** — Reads and sends your Threads direct messages. (Available — not connected; not used yet.)

Health — 6

- **Health Connect** — Your Android health record — steps, heart, sleep and workouts synced from your Samsung phone and watch. (Working — reads from your paired Android phone; used daily.)
- **Apple Health** — Health data from an iPhone — the Apple-side twin of Health Connect. iPhones only. (Available — not connected; not used yet.)
- **Function Health** — Reads Function Health lab and blood-test results and the doctor's notes on them. (Available — not connected; not used yet.)
- **HealthEx** — Gathers your records from your healthcare providers into one read-only place. (Available — not connected; not used yet.)
- **Peloton** — Searches Peloton's class catalog and manages the classes on your Peloton schedule. (Available — not connected; not used yet.)
- **Withings** — Reads a Withings account — weight, blood pressure, heart, sleep, activity and ECG. (Available — not connected; not used yet.)

Home, devices and network — 4

- **1Password** — Fills saved logins from your 1Password vault when signing in to websites in Muse's browser. (Available — not connected; not used yet.)
- **Philips Hue** — Controls Philips Hue lights, rooms and scenes through your Hue bridge. (Available — not connected; not used yet.)
- **Tailscale** — Joins this computer to your private Tailscale network to reach your own services. (Available — not connected; not used yet.)
- **Tessie (Tesla)** — Reads Tesla vehicle state through Tessie and sends supported car commands. (Available — not connected; not used yet.)

Work and building tools — 12

- **GitHub — your key road (custom)** — Your own GitHub connection — the key road that publishes your sites to GitHub every night. (Connected — your own GitHub key road; used daily.)
- **Asana** — A team's projects and tasks — owners, due dates, comments and status. (Available — not connected; not used yet.)
- **GitHub (the system one)** — GitHub's own connector for repositories, files, issues and pull requests. Your nightly publishing does not use this one. (Available — not connected; not used yet.)
- **HighLevel** — A CRM and marketing platform for small businesses — contacts, pipelines, campaigns, invoices. (Available — not connected; not used yet.)
- **Klaviyo** — Email and text-message marketing for businesses. (Available — not connected; not used yet.)

- **Linear** — Tracks software issues, projects and work cycles for a team. (Available — not connected; not used yet.)
- **Lovable** — Reads, creates, edits and deploys your Lovable app projects. (Available — not connected; not used yet.)
- **Replit** — Finds, creates, updates and publishes your Replit apps. (Available — not connected; not used yet.)
- **Slack** — Your Slack work chat — read channels and threads, send messages as you. (Available — not connected; not used yet.)
- **Vercel** — Inspects your Vercel web projects and deployments, and makes reviewed changes. (Available — not connected; not used yet.)
- **Zapier** — Runs actions across apps you connected in Zapier, including apps with no connector of their own. (Available — not connected; not used yet.)
- **Zoom** — Your Zoom meetings, recordings, transcripts and summaries, plus Team Chat. (Available — not connected; not used yet.)
