Packages (from Gmail, last 7 days, read 2026-11-02 — this file only, never in the paper)

- Expected today, Monday, Nov. 2: Peel and Stick Wallpapers coming from Amazon — one item. Amazon's delivery update on Sunday afternoon says "Now arriving tomorrow," after it was first expected on Sunday, Nov. 1.
- Delays or problems: that same wallpaper package is the delay — Amazon's Sunday email says "Your package is delayed" and "Previously expected November 1. We're sorry for the delay," and now puts it arriving today, Monday, Nov. 2.
- Delivered in the last day: nothing new in the mail for Sunday, Nov. 1 or today. The last delivery in the mail is still the Payson Pet Care cat food order delivered Saturday, Oct. 31.
- On the way (not today): two Wall Treatments coming from Amazon — Amazon's shipped email late Sunday night says "Arriving Tuesday," Nov. 3.
- On the way (not today): a package from Amazon, coming by UPS Ground, estimated Tuesday, Nov. 3 between 12:00 PM and 4:00 PM (UPS email, Oct. 30).

The Roundup's own site and Instagram were checked for a new-business or good-news pull-in; none verified for today beyond the flood coverage and yesterday's TJ Maxx opening.

The Morning Record

- Scroll publish (step 10 quotes, from the chain's verify log ~/workspace/morning-post/batch/logs/verify-2026-11-02-20261102-104342.log): --finish verdict — "VERDICT: PASS" (on attempt 2, after GitHub Pages lag on attempt 1). PDF checksum pair, copied from that log's PASS line for the PDF: manifest md5 e5e9b6076130678669982ae89a896385 / live md5 e5e9b6076130678669982ae89a896385 — the pair matches.
- Clock re-check: the 06:10 re-check for today had not reported yet when this record was written — no clock-verify file for 2026-11-02 stands in the batch logs. Yesterday's clock file was checked as well: no clock-verify file for 2026-11-01 stands there either (the newest clock file there is dated 2026-10-17), and no FAIL stands in any clock file found.
- Listen lines: every part of the paper recorded clean — the lead story, Happening in the Holds Today, The Days Ahead, Merchant of the Hold, and Tales from the Treeline — and each recording was published with the edition, each send ending VERDICT: PASS. No part's listen line is missing. The whole-edition recording stands on the manifest at audio/morning-scroll-2026-11-02.mp3 and verified live in the --finish PASS.

Batch processing last night

1. Morning Scroll chain — completed. Its pile line reads: "edition published, chain VERDICT: PASS, checksum pair matched" — it agrees with the verify log. (The chain's first run today stopped at the staging step because the edition file stood in the wrong folder; the file was placed in the edition folder and the re-run published and verified clean, as the chain's own logs show.)

2. Gilded Pages verify — completed. Its pile line reads: "7 entries published, Prescott/Prescott Valley, verify VERDICT: PASS" — it agrees with its log (VERDICT: PASS).

3. yard sales verify — had an error — needs your attention (no report found)

4. Steward's Ledger verify — had an error — needs your attention (no report found)

5. GitHub billing report — had an error — needs your attention (no report found)

6. health pull — had an error — needs your attention (no report found)

7. Hearth publish check — completed (its log's verdict is MATCH; no inventory publish was needed).

- Mismatch count today: 0 (target 0). Counted across the seven lines above: each job's recorded words dated today were compared with the state its named dated log gives. The Scroll chain and Gilded Pages recorded clean finishes and their logs say PASS; the Hearth check recorded MATCH; the four jobs with no report found have no recorded clean finish for today standing against that.

Completion pile — every line not yet reported, in its own words

Each line below stands as it was written in the pile, with its own date. Lines dated today that name one of the seven batch jobs are folded into the batch list above and also stand here in full.
