Hourly status report

Wednesday, October 28, 2026 — 7:00 AM Arizona time

Outstanding work

Errors — 0

No error or failed check stands open in this run.

Cannot move — 0

No item stands blocked in this run.

Waiting on Clay — 0

No item waits on Clay in this run.

Running now

1. **This hourly status report**
   Checked live in this run: the scheduler showed 1 run running, and it is this report. No helper agent was running, and no other work was running.

Mine to do

2. **Build the 149 gates**
   This work comes first when nothing else is running. Last count, from the morning watch audit of October 28, 2026: 6 done in full, 18 wired and waiting for live proof, 37 re-homed, 88 waiting. Gates 89, 91, and 122 gained their live proof last night and this morning. Next step: gates 113 and 114 are judged at the Hearth check-in on October 29. Gate 100 was re-checked in this run: the 5:00 AM morning check output names no separate verdict for it and the completion count still reads 6, so it is not counted as done here. Wiring keeps going in queue order.

Records this page rests on

The open work list (~/workspace/OPEN-WORK.md), read whole in this run: the 149 gates (item 6) is the only open numbered item, and every Waiting on Clay item in that list stands closed. The morning watch audit for the gates (~/workspace/gate-builds/watch-audit-2026-10-28-morning.md) and the completion count (6). Stale check in this run: the Gilded Pages log for today ends VERDICT: PASS, the Steward's Ledger log for today ends VERDICT: PASS, the Morning Scroll check for today ends VERDICT: PASS, and the yard sales check for today ends VERDICT: PASS, so no solved fault stands on this page. The scheduler count was checked live in this run: 1 run running (this report), 0 queued, and no helper agent running.
