2. All day: Sunrise and sunset for Seabrook entry for today (that calendar's own entry, as listed: Sunrise: 4:36am, Sunset: 3:05pm).

3. Nothing else stands on today's calendars in the +agenda listing. Election Day stands tomorrow, Tuesday, Nov. 3, on the Holidays in United States calendar.

3. Packages (from Gmail, last 7 days, read again 2026-11-02 — this file only, never in the paper)

1. Expected today, Monday, Nov. 2: Peel and Stick Wallpapers coming from Amazon — one item. Amazon's delivery update on Sunday afternoon says "Now arriving tomorrow," after it was first expected on Sunday, Nov. 1. No delivered message for it had arrived by the 10:30 AM redo check.

1a. Delays or problems: that same wallpaper package is the delay — Amazon's Sunday email says "Your package is delayed" and "Previously expected November 1. We're sorry for the delay," and now puts it arriving today, Monday, Nov. 2.

2. Delivered in the last day: nothing new in the mail for Sunday, Nov. 1 or today. The last delivery in the mail is still the Payson Pet Care cat food order delivered Saturday, Oct. 31.

19. Sun, Nov. 8: Sedona Mountain Bike Festival, final day, Posse Grounds Park, Sedona.

20. Payson Roundup pull-in story: Sunday's Rim Country flooding and the flood warning running into this morning is the paper's lead story today, checked against the National Weather Service warning as reported Sunday and this morning. The Roundup's own site and Instagram were checked for a new-business or good-news pull-in; none verified for today beyond the flood coverage and yesterday's TJ Maxx opening.

5. The Morning Record

1. The Payson Morning Scroll for Monday, Nov. 2, 2026 stands published from this morning's run (Merchant of the Hold: Merchant Coffee, Prescott; tale: The Marooned Elk Breakfast Rescue). The redo did not rebuild or re-send the edition — the live edition was re-verified instead, so no second copy of the same date was pushed into the archive.

1a. Scroll publish quotes, from the redo's fresh chain verify log ~/workspace/morning-post/batch/logs/verify-2026-11-02-20261102-103021.log: --finish verdict — "VERDICT: PASS" (attempt 1 of the redo re-check). PDF checksum pair, copied from that log's PASS line for the PDF: manifest md5 e5e9b6076130678669982ae89a896385 / live md5 e5e9b6076130678669982ae89a896385 — the pair matches. This morning's first verify log (verify-2026-11-02-20261102-104342.log) also ended VERDICT: PASS with the same pair.

1b. Clock re-check: the 06:10 re-check for today had not reported yet when this record was written — no clock-verify file for 2026-11-02 stands in the batch logs. Yesterday's clock file was checked as well: no clock-verify file for 2026-11-01 stands there either (the newest clock file there is dated 2026-10-17), and no FAIL stands in any clock file found.

1c. Listen lines: every part of the paper recorded clean — the lead story, Happening in the Holds Today, The Days Ahead, Merchant of the Hold, and Tales from the Treeline — and each

recording was published with the edition this morning. No part's listen line is missing. The whole-edition recording stands on the manifest at audio/morning-scroll-2026-11-02.mp3 and verified live in both --finish PASS runs.

1d. Weather note for the redo: the weather pull was run again at 10:26 AM and stands clean (high 55, low 41, overcast, rain 25%). The published edition carries this morning's 3:26 AM pull (high 54, low 43, same overcast call and the same four By the Hours blocks in kind); the small change is the forecast moving during the morning, not an error in the edition.

1e. Hearth prop inventory: the redo's check (step 9) read MATCH on its first pass — the state SHA matches the GitHub SHA, so no publish was needed — and then its last pass in the same run ended VERDICT: UNKNOWN, because the GitHub read failed (two timeouts, then a 403 rate limit answer). No inventory publish was done. That UNKNOWN is carried in batch line 7 below, as the rules require.

2. Batch processing last night — numbered list, each line read from that job's own dated verify log for 2026-11-02:

1. Morning Scroll chain — completed. Its named verify log (the redo's log, above) ends VERDICT: PASS, and no clock FAIL stands against it. Its pile line reads: "edition published, chain VERDICT: PASS, checksum pair matched" — it agrees with the verify log. The pile also holds one ERROR line from this morning's first chain run, for build_and_manifest.py: the first staging try failed because the edition file stood in the wrong folder; the file was placed in the edition folder and the re-run published and verified clean, as the chain's own logs show.

2. Gilded Pages verify — completed. Its log (~/workspace/batch-logs/gilded-pages-healthcare-rollout/2026-11-02.log) ends VERDICT: PASS. Its pile line reads: "7 entries published, Prescott/Prescott Valley, verify VERDICT: PASS" — it agrees with its log.

3. yard sales verify — completed. Its log (~/workspace/batch-logs/yard-estate-sales-refresh/2026-11-02.log) ends VERDICT: PASS. Its pile line reads: "no new sales, none ended, 2 sales carried unchanged, both sheets published, verify VERDICT: PASS" — it agrees with its log. (This morning's first record said "no report found" because that record was written before this job's log stood; the redo corrects it.)

4. Steward's Ledger verify — completed. Its log (~/workspace/batch-logs/stewards-ledger-daily/2026-11-02.log) ends VERDICT: PASS. Its pile line reads: "Edition 22 published, verify VERDICT: PASS" — it agrees with its log. (Corrected the same way as yard sales.)

5. GitHub billing report — completed. Its log (~/workspace/batch-logs/github-billing-watch/2026-11-02.log) ends VERDICT: PASS, with the cycle total at 193 minutes — 6.43% of the included 3,000 minutes — at the top of its own report. Its pile line gives the same 193 minutes and 6.43% and states no different finish, so there is nothing to disagree. (Corrected the same way as yard sales.)

6. health pull — had an error — needs your attention (no report found). No log for 2026-11-02 stands in ~/workspace/batch-logs/health-pull/ — that folder's newest log is dated 2026-10-18.

7. Hearth publish check — had an error — needs your attention. Its dated log (~/workspace/batch-logs/hearth-publish-check/2026-11-02.log) holds two verdicts today: MATCH on the

first pass, then VERDICT: UNKNOWN on the last pass, and the pile holds an ERROR line for hearth_publish_check.py in the pile section below: "verdict UNKNOWN: Non-response: the check could not read GitHub, so no answer came back — try 1: GitHub API request failed: URLError: <urlopen error timed out>; try 2: GitHub API request failed: URLError: <urlopen error timed out>; try 3: GitHub API request failed: HTTPError: HTTP Error 403: rate limit exceeded". The MATCH pass read the state SHA matching the GitHub SHA, so no inventory publish was owed; the UNKNOWN pass is the error that stands.

Mismatch count today: 0 (target 0). Counted across the seven lines above: each job's recorded words dated today were compared with the state its named dated log gives. The Scroll chain, Gilded Pages, yard sales, and Steward's Ledger recorded clean finishes and their logs say PASS; billing's recorded words state no different finish and its log says PASS; the Hearth check's pile ERROR line and its log's last verdict (UNKNOWN) agree that it failed, so there is no disagreement to count; the health pull has no log and no recorded clean finish standing against that.

3. Completion pile — every line dated 2026-11-02 not yet marked REPORTED when the redo began, in its own words:

1. Morning agenda briefing | 2026-11-02 | lists PDF built; Scroll published, chain VERDICT: PASS; Mismatch count today: 0 (target 0) — this is the first run's own finish line; this redo replaces its lists file and PDF.

2. Maker finds watch | 2026-11-02 | no true fit this round — 15 fresh candidates photo-checked; the solid wood dressers failed the size-stated and compare tests, the 82-inch table's seller says the buyer must bring help (project load), and the rest failed the material or finished-work price tests.

3. build_sales.py | 2026-11-02 | STARTED — run started.

4. build_sales.py | 2026-11-02 | sales sheets written.

5. yard_verify.py | 2026-11-02 | STARTED — run started.

6. yard_verify.py | 2026-11-02 | VERDICT: PASS.

7. Yard and estate sales refresh | 2026-11-02 | no new sales, none ended, 2 sales carried unchanged, both sheets published, verify VERDICT: PASS; sources read: EstateSales.org, Craigslist Phoenix, Facebook events, Facebook group Payson AZ Online yardsale, YardSaleSearch.com, Nextdoor, Payson Roundup classifieds; sources not read: none.

8. GitHub billing watch | 2026-11-02 | plan Pro in place, cycle at 193 minutes, 6.43% of the included 3,000.

9. family-photo-access-count | 2026-11-02 | yesterday 2026-11-01 recorded as no record — no signin-2026-11-01.json in Drive; store line verified.

10. github-traffic-count | 2026-11-02 | all five public repositories read on GitHub Traffic pages, VERDICT: PASS.

11. ledger_verify.py | 2026-11-02 | STARTED — run started.

12. ledger_verify.py | 2026-11-02 | VERDICT: PASS.

13. Steward's Ledger | 2026-11-02 | Edition 22 published, verify VERDICT: PASS.

14. Daily walk watch | 2026-11-02 | silent health record kept for Nov 1; steps, walk, sleep and heart not synced, retry watch running; weight Oct 14 and BP Oct 18 unchanged; Gate 139 PASS.

15. My Daily Review | 2026-11-02 | page live for Monday, November 2, 2026: 16 stories across 7 subjects.

16. Morning menu | 2026-11-02 | 9 menu items, 0 pending decisions, page published.

17. Yard and estate sales recheck | 2026-11-02 | no new sales.

18. weather_pull.py | 2026-11-02 | STARTED — run started. (Its finish line was already reported this morning.)

19. build_paper.py | 2026-11-02 | STARTED — run started. (Its finish line was already reported this morning.)

20. prep_publish.py | 2026-11-02 | STARTED — run started. (Its finish line was already reported this morning.)

21. gilded_verify.py | 2026-11-02 | STARTED — run started. (Its finish line was already reported this morning.)

22. verify.py | 2026-11-02 | STARTED — run started. (Its finish line was already reported this morning.)

23. hearth_publish_check.py | 2026-11-02 | ERROR — hearth_publish_check.py at step verdict UNKNOWN: Non-response: the check could not read GitHub, so no answer came back — try 1: GitHub API request failed: URLError: <urlopen error timed out>; try 2: GitHub API request failed: URLError: <urlopen error timed out>; try 3: GitHub API request failed: HTTPError: HTTP Error 403: rate limit exceeded | cleanup: caller stopped on the STOP result; no partial-work cleanup was supplied in the error information | cause: NOT RECORDED | change: NOT RECORDED. (This line came from the redo's own check run at 10:28 AM; it is carried in batch line 7 above.)

24. Older pile lines: 92 STARTED stubs dated Oct 21 – Nov 1 still stand unmarked in the pile; every one belongs to a run whose finish line was already reported on its own morning, so they are counted here once, as a group, and not listed again one by one.
