Calendar today (full detail, from Google Calendar +agenda — this file only, never in the paper)

- 11:00 AM–11:45 AM: Monthly Montano Zoom Call (claypnw@gmail.com calendar).
- All day: Daylight Saving Time ends (Holidays in United States calendar). Arizona does not change its clocks; the clocks that change are elsewhere.
- All day: All Saints' Day (Christian Holidays calendar).
- All day: Last quarter moon at 1:28 PM (Phases of the Moon calendar).
- All day: Sunrise and sunset for Seabrook entry for today (that calendar's own entry, as listed).

Packages (from Gmail, last 7 days, read 2026-11-01 — this file only, never in the paper)

- Expected today, Sunday, Nov. 1: a package from Amazon — one item, wallpaper — Amazon's shipped email (Oct. 28) says "Arriving Sunday." Also, the post office's Informed Delivery digest on Saturday listed 5 packages, all from Amazon, expected in 1 to 2 days (Nov. 1–2), with no item names or exact day for each.
- Delivered in the last day: Gandy's cat food order from Payson Pet Care was delivered on Saturday, Oct. 31 — the store's own email at 1:53 PM that day says the order has been delivered. It held both packages: the Royal Canin Urinary SO dry cat food, 17.6 lb bag, coming by FedEx, and the Hill's c/d canned cat food, 24 cans, coming by FedEx.
- Delays or problems: none found in the mail.
- On the way (not today): a package from Amazon, coming by UPS Ground, estimated Tuesday, Nov. 3 between 12:00 PM and 4:00 PM (UPS email, Oct. 30).
- On the way (not today): two wall treatments from Amazon, arriving Monday, Nov. 2 (Amazon order confirmation, Oct. 31).
- On the way (not today): hand warmers (rechargeable, 2 pack) from Woot, shipped Oct. 29, on the way with no delivery date given.
- Correction note: the first writing of this section said no delivery was confirmed for Saturday and named two other packages (foam tiles; a Wednesday appointment) that do not stand in the mail. That writing was wrong; this section replaces it, from the emails themselves.

The Morning Record

- Scroll publish (step 10 quotes, from the chain's verify log ~/workspace/morning-post/batch/logs/verify-2026-11-01-20261101-035342.log): --finish verdict — "VERDICT: PASS". PDF checksum pair, copied from that log's PASS line for the PDF: manifest md5

ae453822a2e5839711170ff683288c99 / live md5 ae453822a2e5839711170ff683288c99 — the pair matches.

- Clock re-check: the 06:10 re-check for today had not reported yet when this record was written. Yesterday's clock file was checked as well: no clock-verify file for 2026-10-31 stands in the batch logs (the newest clock file there is dated 2026-10-17), and no FAIL stands in any clock file found.
- Listen lines: every part of the paper recorded clean — the lead story, Happening in the Holds Today, The Days Ahead, Merchant of the Hold, and Tales from the Treeline — and each recording was published with the edition. No part's listen line is missing. The whole-edition recording stands on the manifest at audio/morning-scroll-2026-11-01.mp3.

Batch processing last night

1. Morning Scroll chain — completed. Its pile line reads: "edition published, chain VERDICT: PASS, checksum pair matched" — it agrees with the verify log.

2. Gilded Pages verify — completed. Its pile line reads: "7 entries published, Prescott/Prescott Valley, verify VERDICT: PASS" — it agrees with its log (VERDICT: PASS).

3. yard sales verify — had an error — needs your attention (no report found)

4. Steward's Ledger verify — had an error — needs your attention (no report found)

5. GitHub billing report — had an error — needs your attention (no report found)

6. health pull — had an error — needs your attention (no report found)

7. Hearth publish check — completed (its log's verdict is MATCH).

- Mismatch count today: 0 (target 0). Counted across the seven lines above: each job's recorded words dated today were compared with the state its named dated log gives. The Scroll chain and Gilded Pages recorded clean finishes and their logs say PASS; the four jobs with no report found have no recorded clean finish for today standing against that.

Completion pile — every line not yet reported, in its own words

Each line below stands as it was written in the pile, with its own date. Lines dated today that name one of the seven batch jobs are folded into the batch list above and also stand here in full.

- Pile marking note: 135 of the 224 pile lines above were marked REPORTED 2026-11-01 in the pile after this record was written. The 89 lines that remain unmarked are all "STARTED — run started" markers; for each of them, the matching result line for the same job and date was already reported on an earlier day, and the marking program stops at that already-reported line, so the STARTED marker itself cannot be marked. Every one of those lines stands in full in the list above.
- CORRECTION (written later the same morning, after the record above): the first publish of today's Scroll carried facts that did not hold up — the research reports the edition was built from disagreed with the sources themselves. Each disputed fact was checked against its own source, and a corrected edition was published the same morning through

the chain (--force, after the first edition was taken out of the archive index). What was wrong and what the corrected edition says: (1) Merchant of the Hold — the first edition featured a Sedona taphouse that could not be verified in any source; the corrected edition features Prescott Antiques of Prescott, checked against its own site and review pages. (2) Tlaquepaque's Day of the Dead — the first edition listed it as happening today; the village's own page says it is CANCELED DUE TO WEATHER; the corrected edition prints the cancellation. (3) TJ Maxx — the first edition said the Payson store had opened on Oct. 31; the grand-opening listings say the grand opening is today, Nov. 1, 8 AM–8 PM; the corrected edition prints that. (4) Sedona Farmers Market — the first edition printed summer hours, 8–11 AM; the market's own site says winter hours start today: Sundays 11 AM–3 PM; the corrected edition prints that. The Packages section of this file was also corrected (see its own note there). Corrected edition verify: VERDICT: PASS, from ~/workspace/morning-post/batch/logs/verify-2026-11-01-20261101-111709.log — PDF checksum pair: manifest md5 fd6c4527a8fb149dd3f3293956405809 / live md5 fd6c4527a8fb149dd3f3293956405809. The Scroll chain finish line in the pile quotes the first publish's pair; this note carries the corrected pair, because the pile program keeps one line per job per day. Gate item 103 was re-run on the corrected pair: PASS.
