Mailbox Audit — Old Ads, Postal Service Mail, Subscriptions, and Purchases

Status: PARTIAL — stopped by a Gmail rate limit. This is not a finished audit.

Date of this run: Saturday, October 31, 2026 (Arizona time).

Mailbox checked: Clay's Gmail, the only linked account, claypnw@gmail.com.

This was a read-only audit. Nothing was deleted, trashed, archived, labeled, unsubscribed, drafted, or sent.

Cut-off date: mail dated before October 31, 2025 — mail over a year old on the day of the run.

Counts count conversations the way Gmail does: one conversation is one distinct thread. Message counts are also given.

Why it stopped: while sender details were being read for the year 2024, Gmail returned a terminal rate limit for this attempt (5,985 units used, 15 left). The task rules say: report the partial progress plainly and stop, and do not retry. No Gmail work was done after that point.

What that means: the headline counts in Part 1 and Part 1B were fully counted before

the stop and are stated as checked. The full sender-by-sender grouping, Part 2, and Part 3 were not finished, and each is marked NOT CHECKED where it stands below.

Part 1 — Old advertisements (Promotions)

Checked count: 13,730 messages in 13,678 conversations, dated before October 31, 2025, in the Promotions category.

- How it was counted: every matching message was listed page by page until the pages ran out, and conversations were counted from the distinct thread IDs in that full list.
- For scale: the Promotions category holds 15,392 messages in 15,337 conversations in total, for all dates, read from the Promotions label counter on the same morning.
- So about 89 out of every 100 Promotions messages in the mailbox are over a year old.

Old Promotions mail by year — each line says what the line counts

- Before January 1, 2020: 4,339 messages in 4,316 conversations. This is the oldest block and spans all years before 2020 in one line.
- Calendar year 2020: 615 messages in 613 conversations.
- Calendar year 2021: 418 messages in 418 conversations.
- Calendar year 2022: 2,749 messages in 2,735 conversations.
- Calendar year 2023: 3,529 messages in 3,521 conversations.
- Calendar year 2024: 1,350 messages in 1,348 conversations.
- January 1 to October 30, 2025: 738 messages in 735 conversations.
- Note: the year lines add to 13,738 messages, 8 more than the direct total of 13,730, because the year lines were counted with “after” date edges. The direct total — 13,730 messages in 13,678 conversations — is the number to use.

Sender grouping for old advertisements — NOT CHECKED for the full set

The full job — every one of the 13,730 messages grouped by sender, sorted biggest first — was NOT finished. Gmail stopped the run while the 2024 sender details were being read.

Top 5 senders for the full old-ad set: NOT CHECKED, and not guessed here.

What was read, as a sample only: one full month slice, January 2025, read in full before the stop. It holds 38 Promotions messages, dated January 5 to January 26, 2025. Senders in that one month, biggest first:

- **SOLE Fitness, news@soletreadmills.com** — 8 messages in January 2025, oldest January 14, 2025, newest January 26, 2025. Arrived under two display names, “SOLE Fitness” and “Alex @ SOLE Fitness”, from the same address.
- **Visionworks, visionworks@c.visionworks.com** — 5 messages in January 2025, oldest January 6, 2025, newest January 18, 2025.
- **eero, support@email.eero.com** — 3 messages in January 2025, oldest January 5, 2025, newest January 19, 2025.
- **Amazon.com, store-news@amazon.com** — 3 messages in January 2025, oldest January 5, 2025, newest January 15, 2025. Store news and offer mail, not order mail.
- **xTool, no-reply@edm.xtool.com** — 2 messages in January 2025, oldest January 22, 2025, newest January 24, 2025.
- **Verizon Wireless, no-reply@customer.verizon.com** — 2 messages in January 2025, oldest January 19, 2025, newest January 22, 2025.
- **John & Mercedes Condon, rvoddcouple@a.kajabimail.net** — 2 messages in January 2025, oldest January 15, 2025, newest January 22, 2025.
- **Harbor Freight, hft@em.harborfreight.com** — 2 messages in January 2025, oldest January 10, 2025, newest January 15, 2025.
- **APS, donotreply@info.aps.com** — 1 message in January 2025, on January 24, 2025.
- **DrJockers.com, info@drjockers.com** — 1 message in January 2025, on January 23, 2025.
- **Cigars International, feedback@eml.cigarsinternational.com** — 1 message in January 2025, on January 21, 2025.
- **SiriusXM, no-reply@e.siriusxm.com** — 1 message in January 2025, on January 17, 2025.
- **Robert from Keto Brick, info@ketobrick.com** — 1 message in January 2025, on January 16, 2025.

- **Blue Cross Blue Shield Federal Employee Program, BCBS.FEP@email.azblue.com** — 1 message in January 2025, on January 13, 2025.
- **Filmora, noreply@best.wondershare.com** — 1 message in January 2025, on January 10, 2025.
- **Freedom Mortgage Corporation, marketing.department@email-freedommortgage.com** — 1 message in January 2025, on January 9, 2025.
- **Home Depot Pro Xtra, homedepotpro@mg.homedepot.com** — 1 message in January 2025, on January 9, 2025.
- **MyNISSAN Rewards, nissan@mnr.nissanusa.com** — 1 message in January 2025, on January 8, 2025.
- **Neoplants, friends@hello.neoplants.co** — 1 message in January 2025, on January 6, 2025.

This sample is one month only. It does not show the biggest senders in the full 13,730 messages, and it must not be read that way.

The five newest old advertisements — all October 30, 2025

- Visionworks, visionworks@c.visionworks.com — “VSP Members can get extra to spend on select frames,” October 30, 2025.
- Emma @ Arizona Family Destinations, emma@familydestinationsguide.com — two messages on October 30, 2025, one about a quiet Arizona town and one about seafood restaurants in Arizona.
- Freedom Mortgage Corporation, marketing.department@email-freedommortgage.com — “Breaking News—Federal Reserve cuts interest rates again!,” October 30, 2025.
- Reddit, noreply@redditmail.com — “Are you a business on Reddit? Learn what Reddit Pro can do for you,” October 30, 2025.

Part 1B — Postal Service mail (United States Postal Service)

- Checked count: 1,370 messages in 1,341 conversations from usps.com addresses, dated before October 31, 2025.

- This group stands on its own, apart from the advertisements, as Clay asked on October 30, 2026: he will not look at Postal Service mail a year old or older.
- How it was counted: every message from a usps.com address dated before the cut-off was listed page by page until the pages ran out, and conversations were counted from the distinct thread IDs.
- For scale: mail from usps.com addresses for all dates totals 1,683 messages in 1,654 conversations, so most Postal Service mail in this mailbox is over a year old.
- Mail carrying the words “Informed Delivery,” dated before the cut-off: 1,380 messages in 1,349 conversations. This overlaps the count above and must not be added to it.
- Mail carrying the word “USPS” anywhere, dated before the cut-off: 1,490 messages in 1,443 conversations. This wider count also catches mail from other senders that only mention the Postal Service, so it is not all mail from the Postal Service. It also overlaps and must not be added.
- Sender name and address breakdown for this group, with oldest and newest dates per sender: NOT CHECKED. The counts were finished, and the sender-detail read was not reached before Gmail stopped the run.

Part 2 — Subscriptions and recurring charges — NOT CHECKED

- No subscription list was built. The searches for receipts, invoices, renewal notices, and subscription and payment wording were not run before Gmail stopped the run.
- Number of subscriptions found: NOT CHECKED — not zero. Zero would mean the search ran and found none, and the search did not run.
- “Worth a look” flags: NOT CHECKED. No charge can be flagged, and no charge can be cleared, from this run.

Part 3 — Purchases — NOT CHECKED

- No purchase totals were built. The searches for order confirmations and shipping notices from Amazon, Woot, Walmart, eBay, and other stores were not run before Gmail stopped the run.

- Totals spent by store and by year: NOT CHECKED — not zero.
- Order counts by store: NOT CHECKED — not zero.
- The 10 biggest single purchases: NOT CHECKED. None are listed, because none were read.

What was done, what was not done, and what a later run needs to do

- Done and checked: the full count of old Promotions mail (13,730 messages, 13,678 conversations), the year-by-year counts, one full month of sender detail (January 2025, 38 messages), the five newest old advertisements, and the Postal Service counts (1,370 messages, 1,341 conversations from usps.com before the cut-off).
- Not done: the sender-by-sender grouping for all old advertisements, the sender breakdown for Postal Service mail, the whole subscription and recurring-charge list, and the whole purchase summary.
- Why: Gmail returned a terminal rate limit for this attempt, and the task rules and the Gmail connector rules both say the same thing — report the partial progress and stop, do not retry in this attempt.
- A later run can continue this audit from this report. The later run should read sender details in small slices, a month or less at a time, and stay well under the request limit, because one large read is what used up the budget in this run.
- Nothing in this run changed the mailbox in any way. This report is a list for Clay to review first, as planned. No mail was deleted, trashed, archived, labeled, or unsubscribed.
